

AI Operations & Systems Assignment

Objective

- Assess AI fluency, systems thinking, workflow optimisation, automation mindset, and practical implementation ability.

Task 1 — Workflow Improvement Challenge

- Choose one repetitive educational workflow and redesign it using AI.
- Explain the current system, problems, improved AI workflow, and expected benefits.

Task 2 — AI Tool Demonstration

- Using tools such as ChatGPT, Claude, Zapier, Make.com, Airtable, or Canva AI, create one practical educational system.

Task 3 — AI-Assisted Educational Resource Creation

- Using AI tools, create either a Maths worksheet or Science learning resource for students aged 10–15.
- Demonstrate engaging explanations, scaffolded learning, and thoughtful design.

What We Are Looking For

- AI fluency
- Automation thinking
- Workflow optimisation
- Communication clarity
- Creativity and initiative
- Practical implementation ability
